It is with great pleasure that I write this letter of recommendation for Lynn Novitsky of LAN Communications.

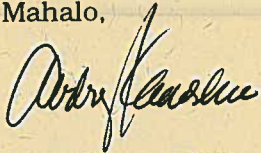

I met Lynn through a business friend who has been in the networking industry for many years. His point was, she could research your phone systems, review vendor billings to ensure you are setup efficiently and billed accurately.

With her background in tariffs and telecommunications infrastructure, she was able to reveal over \$9000.00 in billing errors by one of our vendors which we received credit for. We were able to cancel several phone lines that were no longer in use and she saved us tremendously on our advertising surveys that are tracked on a monthly basis.

With her knowledge and expertise, she has set us up with a savings of 63% in our phone billings in less than a year. She continues to work with us on other areas as we expand our company and we truly appreciate her ongoing commitment to customer satisfaction.

Please feel free to contact me with any questions regarding Lynn's services.
